Returning a file is a response is a content type, not a ProducesResponseType which would signify a json or xml document schema. If Swagger does not pick up on the ProducesAttribute on the action method, then I would simply leave the Type for ProducesResponseType unset and use a <response code="200">Returns the requested file</response> comment – Moho Sep 26 '17 at 14:50

Try to access to the value attribute of your file input on the change event. Most browsers will give you only the file name, but there are exceptions like IE8 which will give you a fake path like: "C:\fakepath\myfile.ext" and older versions (IE <= 6) which actually will give you the full client file-system path (due its lack of security).
