The collapse of Roman rule in Britain was not so much a sudden catastrophe as a long and drawn-out decline. The 'Celtic' Britons retreated gradually to the highland areas of Wales, Cornwall and the south-west of Scotland. Control of the fertile eastern lowlands was lost to warriors of Germanic origin who migrated from the Continent. These Germanic conquerors have become known to history as the 'Anglo-Saxons'. They were to dominate the lowland zone of Britain until their final defeat at Hastings in 1066. This title gives an insight into the everyday life, equipment, dress, battle tactics and life on campaign of the typical Anglo-Saxon warrior of this period - the thegn.

The Arthurian Age; the Celtic Twilight; the Dark Ages; the Birth of England; these are the powerfully romantic names often given to one of the most confused yet vital periods in British history. It is an era upon which rival Celtic and English nationalisms frequently fought. It was also a period of settlement, and of the sword. This absorbing volume by David Nicolle transports us to an England shrouded in mystery and beset by savage conflict, a land which played host to one of the most enduring figures of our history - Arthur.

In the two centuries before the Norman invasion of England, Anglo-Saxon and Viking forces clashed repeatedly in bloody battles across the country. Repeated Viking victories in the 9th century led to their settlement in the north of the country, but the tide of war ebbed and flowed until the final Anglo-Saxon victory before the Norman Conquest. Using stunning artwork, this book examines in detail three battles between the two deadly foes: Ashdown in 871 which involved the future Alfred the Great; Maldon in 991 where an Anglo-Saxon army sought to counter a renewed Viking threat; and Stamford Bridge in 1066, in which King Harold Godwinsson abandoned his preparations to repel the expected Norman invasion in order to fight off Harald Hard-Counsel of Norway. Drawing upon historical accounts from both English and Scandinavian sources and from archaeological evidence, Gareth Williams presents a detailed comparison of the weaponry, tactics, strategies and underlying military organization of the Anglo-Saxons and Vikings, and considers the developments which took place on both sides in the two centuries of Viking incursions into Anglo-Saxon England.

When Norwegian Vikings first raided the European coast in the 8th century AD, their leaders were from the middle ranks of warriors known as hersirs. At this time the hersir was typically an independent landowner or local chieftain with equipment superior to that of his followers. By the end of the 10th century, the independence of the hersir was gone, and he was now a regional servant of the Norwegian king. This book investigates these brutal, mobile warriors, and examines their tactics and psychology in war, dispelling the idea of the Viking raider as simply a killing machine.

The political situation in Ireland at the beginning of the 20th century was characterised by crisis and change. Armed rebellion against the British Crown, the prosecution of the Anglo-Irish War, the emergence of the Irish Free State, and the eruption of the Civil War over the treaty with Great Britain ensured that the birth of the modern Irish nation was bloody and difficult. This book details the life of an average Volunteer, and includes the experiences of internment, the lack of established medical facilities for wounded, life on the run, discipline, and typical duties.

The vicious conflict (1964-79) that brought Robert Mugabe to power in Zimbabwe Expert coverage of the war, its historical context, and its aftermath Descriptions of guerrilla warfare, counterinsurgency operations, and actions by units like Grey's Scouts Amid the colonial upheaval of the 1960s, Britain urged its colony in Southern Rhodesia (modern-day Zimbabwe) to grant its black residents a greater role in

governing the territory. The white-minority government refused and soon declared its independence, a move bitterly opposed by the black majority. The result was the Rhodesian Bush War, which pitted the government against black nationalist groups, one of which was led by Robert Mugabe. Marked by unspeakable atrocities, the war ended in favor of the nationalists.

In the 1st century BC, Strabo wrote of the Celts: 'The whole race... is madly fond of war, high-spirited and quick to battle... and on whatever pretext you stir them up, you will have them ready to face danger, even if they have nothing on their side but their own strength and courage'. This book gives an insight into the life of the Celtic warrior, and his experience of battle – on foot, on horseback, and as a charioteer. It also details Celtic society and studies the vital ritual nature of Celtic warfare, from the naked gaesatae to the woad-painted warriors.

Throughout the 11th and 12th centuries the Norman knight was possibly the most feared warrior in Western Europe. He was descended originally from the Vikings who had settled in Northern France under their leader Rollo in or around 911 at the behest of Charles the Simple and throughout the following centuries they remembered and built on their warlike reputation. This book shows how their military prowess was renowned throughout the known world and resulted in Normans conquering Sicily in 1060 and England in 1066, as well as participating in many important battles in Italy and playing a major part in the First Crusade.
