Originally developed by the Business Process Management Initiative, BPMN has been maintained by the Object Management Group since the two organizations merged in 2005. Version 2.0 of BPMN was released in January 2011, at which point the name was amended to Business Process Model and Notation to reflect the introduction of execution semantics, which were introduced alon

BPMN 2.0 is the industry standard diagramming language for business process models. The meaning of the business process diagram is the same, regardless of the tool used to create it. But creating models that are correct, complete, and clear demands more than a dictionary of BPMN shapes and symbols.

BPMN Process Model - Descriptive, Analytic (Operational) to Executable. It is often said that BPMN 2.0 is becoming too complicated comparing to 1.0 and 1.2, especially for business users and process modelers in general. The comprehensive notation set in BPMN 2.0, in fact, is one of its key benefits in comparison to its predecessors - the ability of the business process models to be executed on the process engines.
