Fire Safety Design of Buildings - BS 9999 | Fire ...

BS 9999 is one of the most important guidance documents dealing with fire safety in buildings and, as stated in the document, its principal purpose is 'to provide Guidance which gives a more transparent and flexible approach to fire safety design through the use of a structured approach to risk-based design where designers can take account of varying physical and human factors'.

BS9999 FIRE REGULATIONS.pdf | Risk Assessment | Fire Safety

The concept behind the development of BS 9999 and BS 7974 is that technical guidance on fire safety is provided at three different levels. This permits a design approach to be adopted that corresponds to the complexity of the building and to the degree of flexibility required. The three levels are as follows:

BS 9999 allows for a slightly increased travel distance giving 20 metres in the case of a single means of escape and 50 metres in the case of additional exits. (ADB 2 specifies travel distance of 18 and 45 m respectively). Both documents have the limit of single exit permitted for < 60 people or <30 in the event of assisted evacuation being required. Exit width depends on aggregate with BS ...

Fire - BS9999 v Building Regulatons

BS 9999, which has taken over ten years to develop, was published by the British Standards Institution in October 2008. The document builds on the existing government guidance to provide an enhanced design guide which is based on scientific analysis and research.

A Guide to BS 9999:2008 - AOSH

BS 9999:2008 is based on government guidance and provides a best practice framework for fire safety. The standard outlines ways to test all aspects of your fire strategy, including easy access to exits, to ensure the safety of people in and around the buildings.
