In this electrifying bestseller, the shrewd and voluble trial lawyer Louis Nizer, who made a long career of representing famous people in famous cases, recounts some of his significant civil and criminal cases. Nizer rose to national fame with his real-life accounts of tension-filled courtrooms and the fervor of the advocate, and “ My Life in Court ” proved to be no exception: it rose to the top of the Times ’ s best-seller list on its publication in 1961 and logged 72 weeks as a sales leader. The book is an in-depth collection of some of Mr. Nizer ’ s court case success stories, including his client Quentin Reynolds ’ famous libel action against the columnist Westbrook Pegler, which would also become the basis of the 1963 Broadway play “ A Case of Libel. ” Praised by critics as “ entertaining and philosophically instructive, an unusual combination, ” Nizer ’ s movie-like plots of real-life courtroom drama will keep you captivated until the very last page.

First he ’ ll learn her most intimate secrets. Then he ’ ll arouse her deepest passions. He ’ s the lover she ’ s been waiting for: the man who can rescue her from her wicked past—for a price—in Madeline Hunter ’ s tale of sin, seduction, and irresistible, impossible love. He catches her eye across the dining room—a handsome stranger who stands out among the lewd noblemen and bawdy painted women. But their worlds are about to collide in a way Roselyn Longworth could never have imagined. For before the night is out, she will be auctioned off to the highest bidder...and Kyle Bradwell will lead her from one kind of hell to another. Yet from the moment he wins her, Kyle treats Rose with a gentleness she hasn ’ t known since a family scandal destroyed her reputation. And when she finally learns what is really driving Kyle, it ’ s too late. For Rose has fallen for the man who knows her most intimate secrets. Now he has stunned her with a proposal of marriage—the first step in a seduction that will demand nothing less than her complete surrender....

This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech

Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research

This comprehensive book brings together the latest information about heat islands and their mitigation. The book describes how heat islands are formed, what problems they cause, which technologies mitigate heat island effects and what policies and actions can be taken to cool communities. Internationally renowned expert Lisa Gartland offers a comprehensive source of information for turning heat islands into cool communities. The author includes sections on cool roofing and cool paving, explains their benefits in detail and provides practical guidelines for their selection and installation. The book also reviews how and why to incorporate trees and vegetation around buildings, in parking lots and on green roofs.
