A number of guides are available from Network RADIUS. In particular, we recommend the Technical Guide, which should be read by every new RADIUS administrator. It explains RADIUS concepts, and covers how to perform introductory administration and maintenance. More in-depth guides are available on the same page.

### ~~Getting Started — FreeRADIUS~~

The FreeRADIUS project maintains the following components: a multi protocol policy server (radiusd) that implements RADIUS, DHCP, BFD, and ARP; a BSD licensed RADIUS client library; a RADIUS PAM library; and an Apache RADIUS module. We provide a step-by-

step guide to radiusd -X. The guide breaks down the different pieces of the debug output, and explains what they mean.

## FreeRADIUS

This chapter describes the configuration FreeRADIUS file structure and the purpose of the configuration file types:

- Core configuration files
- The radiusd.conf file
- File format
- The packet processing sections
- The users file.

The /etc/raddb directory contains the configuration files. The main configuration file, which is named

server to support Extensible Authentication Protocol (EAP) FreeRADIUS is also the only open source RADIUS server ...

## ~~The Freeradius Technical Guide Network Radius~~

This Technical Guide refers to FreeRADIUS version 2.0 for several reasons: firstly, when installing FreeRADIUS 2.0, the EAP section is automatically populated with a working certificate system ideal for testing (you should replace the certificates with appropriate versions before going into service); the EAP engine is vastly improved over version 1.1.x (an EAP authentication now only needs to pass through the LDAP or SQL section once, thus vastly reducing load
