This volume appears now finally in English, sixty years after the death of its author. Lucien Tesnière. It has been translated from the French original into German, Spanish, Italian, and Russian, and now at long last into English as well. The volume contains a comprehensive approach to the syntax of natural languages, an approach that is foundational for an entire stream in the modern study of syntax and grammar. This stream is known today as dependency grammar (DG). Drawing examples from dozens of languages, many of which he was proficient in, Tesnière presents insightful analyses of numerous phenomena of syntax. Among the highlights are the concepts of valency and head-initial vs. head-final languages. These concepts are now taken for granted by most modern theories of syntax, even by phrase structure grammars, which represent, in a sense, the opposite sort of approach to syntax from what Tesnière was advocating. The present book is a revision of my Latin Grammar originally published in 1895. Wherever greater accuracy or precision of statement seemed possible, I have endeavored to secure this. The rules for syllable division have been changed and made to conform to the prevailing practice of the Romans themselves. In the Perfect Subjunctive Active, the endings -7s, -7mus, -7tis are now marked long. The theory of vowel length before the suffixes -gnus, -gna, -gnum, and also before j, has been discarded. In the Syntax I have recognized a special category of Ablative of Association, and have abandoned the original doctrine as to the force of tenses in the Prohibitive.
