Gaspard Monge
Gaspard Monge, Comte de P é luse (9 May 1746 – 28 July 1818) was a French mathematician, the inventor of descriptive geometry (the mathematical basis of technical drawing), and the father of differential geometry. During the French Revolution he served as the Minister of the Marine, and was involved in the reform of the French educational system, helping to found the É cole Polytechnique

Gaspard Monge - Wikipedia
Gaspard Monge, count de P é luse, (born May 10, 1746, Beaune, France—died July 28, 1818, Paris), French mathematician who invented descriptive geometry, the study of the mathematical principles of representing three-dimensional objects in a two-dimensional plane; no longer an active discipline in mathematics, the subject is part of mechanical and architectural drawing.

Gaspard Monge, count de P é luse | French mathematician and ...
Gaspard Monge is considered the father of differential geometry because of his work Application de l'analyse à la g é om é trie where he introduced the concept of lines of curvature of a surface in 3 -space. View nine larger pictures

Gaspard Monge 1746-1818
French Mathematician, Physicist and Chemist
T he most widely recognized of the many achievements attributed to Gaspard Monge, sometimes known as the comte de P é luse, was his development of descriptive geometry as a means of representing three-dimensional objects in two dimensions.

Gaspard Monge | Encyclopedia.com
Gaspard Monge is one of 72 scientists whose name is on the first floor of the Eiffel Tower. He is 18th, on the face turned to the South.
Gaspard Monge, a surveyor, was born at Beaune, in Burgundy, in 1746. He died in Paris on July 18, 1818.

Biography of Gaspard Monge
Gaspard Monge the Mathematician
In the year 1818 Gaspard died of a stroke, having had all his honours taken way by the Bourbons. However, mathematicians will always remember Gaspard Monge as the inventor of Descriptive Geometry and also, the application of his analysis techniques of the theory of curvature.

Gaspard Monge Biography - Who Invented First
French mathematician Gaspard Monge invented descriptive geometry and pioneered the development of analytical geometry, both of which have since become part of projective geometry. He was born on May 10, 1746, in Beaune, France.

Gaspard Monge - Students | Britannica Kids | Homework Help
Monge(A601), named after the 18th century mathematician Gaspard Monge, is a unique missile range instrumentation shipof the French Navydedicated to tracking and measuring rocket trajectories. She was built for the trials of the submarine-launched ballistic missilesof the French Navy, and is also used to monitor the launch of Ariane rockets.

Gaspard Monge. View the biography of Gaspard Monge. Descriptive geometry has two objects: the first is to establish methods to represent on drawing paper which has only two dimensions, -- namely, length and width, -- all solids of nature which have three dimensions, -- length, width, and depth, -- provided, however, that these solids are capable of rigorous definition. The second object is to ...
