Issues in Calculus, Mathematical Analysis, and Nonlinear Research: 2012 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Nonlinear Research. The editors have built Issues in Calculus, Mathematical Analysis, and Nonlinear Research: 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Nonlinear Research in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Calculus, Mathematical Analysis, and Nonlinear Research: 2012 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

MASS MEDIA RESEARCH: AN INTRODUCTION, 9e, begins with an overview of mass communication research and the ethics of research. It then explores each major approach to research, including qualitative research, content analysis, survey research, longitudinal research, and experimental research. The text continues with a section on data analysis and concludes with a forward-looking section on applying research methods to the primary areas of interest including print, electronic media, advertising, and public relations. Coverage of mass media research and the Internet, which was presented in a concluding chapter in the previous edition, has now been integrated as appropriate throughout the text. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Current Topics in Membranes is targeted toward scientists and researchers in biochemistry and molecular and cellular biology, providing the necessary membrane research to assist them in understanding the current state and future prospects of a particular field. This volume on exchangers, in conjunction with a previous volume on cotransporters (volume 70), represents an up-to-date, systematic, and comprehensive review of all the major secondary active carrier proteins responsible for the absorption, secretion, and general transport of ions and solutes in mammalian organ systems and additional species. Each chapter is devoted to a specific transporter or a grouping of related transporters based on the well-recognized nomenclature of the Solute Carrier (SLC) gene family. This book provides readers with the latest mechanistic information on the function and structure of specific transporters, as well as their history and physiological significance. Comprehensive review of all the major exchangers Emphasis on protein mechanism with the most recent findings from functional and structural work Authoritative work from experts in the field

Volumes for 1898-1941, 1948-56 include the Society's proceedings (primarily abstracts of papers presented at the 10th-53rd annual meetings, and the 1948-56 fall meetings).

This handbook offers a comprehensive review of intellectual disabilities (ID). It examines historical perspectives and foundational principles in the field. The handbook addresses philosophy of care for individuals with ID, as

well as parent and professional issues and organizations, staffing, and working on multidisciplinary teams. Chapters explore issues of client protection, risk factors of ID, basic research issues, and legal concerns. In addition, chapters include information on evidence-based assessments and innovative treatments to address a variety of behaviors associated with ID. The handbook provides an in-depth analysis of comorbid physical disorders, such as cerebral palsy, epilepsy and seizures, and developmental coordination disorders (DCD), in relation to ID. Topics featured in this handbook include: Informed consent and the enablement of persons with ID. The responsible use of restraint and seclusion as a protective measure. Vocational training and job preparation programs that assist individuals with ID. Psychological and educational approaches to the treatment of aggression and tantrums. Emerging technologies that support learning for students with ID. Key sexuality and relationship issues that are faced by individuals with ID. Effective approaches to weight management for individuals with intellectual and developmental disabilities. The Handbook of Intellectual Disabilities is an essential reference for researchers, graduate students, clinicians and related therapists and professionals in clinical child and school psychology, pediatrics, social work, developmental psychology, behavioral therapy/rehabilitation, child and adolescent psychiatry, and special education.

Worldwide energy and food crises are spotlighting the importance of bio-based products – an area many are calling on for solutions to these shortages. Biocatalysis and Agricultural Biotechnology encapsulates the cutting-edge advances in the field with contributions from more than 50 international experts comprising sectors of academia, industry, and government research institutes, a virtual Who's Who among biocatalysis scientists. Created Under the Editorial Guidance of Leading Biotechnology Experts With the aid of numerous graphs and illustrations, this authoritative reference documents such important advances as: Cloning and characterization of Kennedy pathway acyltransferases Engineering of plants for industrial uses New approaches from acquired tolerance to the biotic and abiotic stress of economically important crops This comprehensive text also explores a variety of bio-based industrial products, including: The modification of enzyme character through gene manipulation The biocatalytic synthesis of chiral intermediates for drug development The use of Omega-3 phospholipid nano capsules as effective forms for transporting immune response modifiers Providing in-depth reviews of this ancient field and its modern-day advances, Biocatalysis and Agricultural Biotechnology is an invaluable lab reference for teachers, graduate students, and industrial scientists conducting research in the biosciences.
