The revised edition of Business Environment presents a thorough overhaul, updated with the latest information and developments. Having ten new chapters, including comparative study of business environments in India, China, SAARC and European Countr

The first India Migration Report proposed by the Research Unit on International Migration set up by the Ministry of Overseas Indian Affairs, Government of India at the Centre for Development Studies, Thiruvananthapuram, Kerala is organised into articles on four broad themes: migration, remittances, gender, and policy issues. The opening article reviews the historical trends in international migration, followed by two articles that deal with workers' remittances and one which discusses the maturity that Kerala emigration reached in this state. Other articles focus on cross-border migration in developing countries, and as yet less documented gender issues, including the migration of nurses and housemaids. Though large numbers of unskilled and semi-skilled labourers migrate to the Gulf region, the prevailing labour laws and the violation of human rights in the GCC countries are an unexplored area; this is something this volume also addresses. The cost of migration and the role played by unscrupulous recruitments agents are serious concerns for both the government and international agencies working in migration. The Emigration Act 1983 provides guidelines for organising recruitment business in India. Do we have to revamp the recruitment system? These are some of the themes this book discusses.

Revised version of papers presented at the International Conference on Kerala's Development (1956-2006) : Issues, Strategies and Options, held at Thiruvananthapuram.

Over just a decade in India, the mobile phone was transformed from a rare, unwieldy instrument to a palm-sized staple that even poor fisherman can afford. Assa Doron and Robin Jeffrey investigate the social revolution ignited by what may be the most significant communications device in history and explore the whole ecosystem of cheap mobile phones.

The aftermath of the COVID-19 issues have started impacting the economy and specifically on the MSMEs. The various sectors of the economy, viz., agriculture, manufacturing and services have started to feel the impact of the same. The highlight of the book is that all articles have ensured conceptual clarity, research focus and the areas that need immediate attention. The sub sectors of the economy which are not usually given importance are also been taken into consideration including fisheries and blue economy, value added agricultural products, banking sector, IT sector and also on supply chain management. The book clearly gives direction as per title on the activities undertaken earlier, contemporary scenario and also the future focus. How these sectors will usher in employment, address the inequalities and also ensure there is no lacunae in the standards set is also another highlight of all articles.
