5. Prove that the following
Lebesgue integrals exist: $\int_0^1 (x \log x)^2 dx$, $\int_0^1 \log x \log(1-x)^2 dx$, $\int_0^1 \frac{1-x}{1-x \log x} dx$. Solution:
The function $(x \log x)^2$ is
continuous, hence measurable, and

Acces PDF Lebesgue Integration Exercises And Solutions File Type

In mathematics, the integral of a non-negative function of a single variable can be regarded, in the simplest case, as the area between the graph of that function and the x -axis. The Lebesgue integral extends the integral to a larger class of functions. It also extends

Acces PDF Lebesgue Integration Exercises And Solutions File Type

the domains on which these functions can be defined. Long before the 20th century, mathematicians already understood that for non-negative functions with a smooth enough graph—such as continuous functions on closed bounded ...
