The study examined Air Force C2 in seven cases covering the spectrum of conflict to determine whether doctrine and organizational structures require change to fit uncertain and dynamic future scenarios. The study's results showed that USAF C2 design must change in order to increase its adaptability. An overall goal for adaptive C2 is offered along with six questions to aid a commander in creating adaptable C2 structures. The goal of adaptive C2 is to achieve unity of effort through integration at the appropriate organizational level, enabling agility and speed of action in delivering effects. The six questions address the following issues: the nature of an operation, available resources, capabilities of subordinate units, degree of trust and confidence, political risk, and the need to exploit interaction among the speed, range, flexibility, versatility, and battlespace perspective of Air Force capabilities.

"The purpose of this text is to acquaint intermediate drum students with the 26 rudiments of drumming. Each rudiment requires the development of a particular sticking, stick motion, stick height and rhythm pattern. The capability to play the 26 drum rudiments provides the student with the skill and technique necessary to play advanced drum literature, pursue other styles of drumming, and to proceed on to a high level of learning. All 26 original drum rudiments are clearly and sequentially presented. There are several exercises designed to develop each rudiment, then each rudiment is utilized in a musical context in several progressively written rudimental rhythm studies. Also, at the end of this book, there are seven rudimental snare drum solos appropriate for band tryouts and junior high contest. This is the follow-up to Fundamentals of Rhythm for the Drummer (94493)."
