Wars in the Woods examines the conflicts that have developed over the preservation of forests in America, and how government agencies and advocacy groups have influenced the management of forests and their resources for more than a century. Samuel Hays provides an astute analysis of manipulations of conservation law that have touched off a battle between what he terms “ecological forestry” and “commodity forestry.” Hays also reveals the pervading influence of the wood products industry, and the training of U.S. Forest Service to value tree species marketable as wood products, as the primary forces behind forestry policy since the Forest Management Act of 1897. Wars in the Woods

gives a comprehensive account of the many grassroots and scientific organizations that have emerged since then to combat the lumber industry and other special interest groups and work to promote legislation to protect forests, parks, and wildlife habitats. It also offers a review of current forestry practices, citing the recent Federal easing of protections as a challenge to the progress made in the last third of the twentieth century. Hays describes an increased focus on ecological forestry in areas such as biodiversity, wildlife habitat, structural diversity, soil conservation, watershed management, native forests, and old growth. He provides a valuable framework for the critical assessment of forest management policies and the future study and protection of forest resources.

Disengaged executive sponsors Misalignment with goals Poor change management Ineffective governance Lackluster leadership Ignoring any of these gaps will hex any strategy or project. They regularly destroy hundreds of companies' ability to turn their corporate vision into business value—taking careers with them. Filling Execution Gaps addresses the sources of these gaps, and how to fill them. Without any one of these important functions, projects fail. Without change management, adoption suffers. Without common understanding, there is confusion. Without goals, business units, and capabilities aligned, execution falters. Without executive sponsorship, decisions languish. Too little governance allows bad things to happen, while too much governance creates overburdening bureaucracy. Without leadership at all levels of the organization, people are directionless. Using decades of experience, years of research, and interviews with hundreds of business leaders, Todd Williams illustrates how to fill these gaps, meet corporate goals, and increase value.
