On Linux and macOS you can find
the user base binary directory by
running `python-m site--user-base`
and adding `bin` to the end. For
example, this will typically print
`~/local` (with `~` expanded to the
absolute path to your home
directory) so you ' ll need to add
`~/local/bin` to your `PATH`. You can
set your `PATH` permanently by
modifying `~/.profile`.
