Renewable Diesel & Supercritical Biodiesel vs. Petro-Diesel

Because renewable diesel is chemically the same as petroleum diesel, it may be used in its pure form (called R100) or mixed/blended with petroleum diesel similar to biodiesel blending. A blend of 20% renewable diesel and 80% petroleum diesel is called R20, and a blend of 5% renewable diesel and 95% of petroleum diesel is called R5. The U.S. Energy Information Administration (EIA) reports data for renewable diesel fuel imports.

Renewable Diesel Supercritical Biodiesel Vs Petro Diesel

Merely said, the renewable diesel supercritical biodiesel vs petro diesel is universally compatible once any devices to read. The Open Library has more than one million free e-books available. This library catalog is an open online project of Internet Archive, and allows users to contribute books.

Renewable Diesel Supercritical Biodiesel Vs Petro Diesel

Diesel is produced from petroleum crude, which is a fossil fuel. Whereas, Biodiesel is produced from vegetable oils & animal fats, which is biodegradable. Biodiesel produces far less emissions compared to Diesel.

Whereas growth in first- and second-generation biodiesel production has slowed in Europe and the Americas, the opposite is true for hydrotreated vegetable oil (HVO), also known as renewable diesel. More hydrotreating plants are being built to convert especially waste oils and fats into renewable diesel suitable for aviation, which biodiesel is not.

RPS offers Biodiesel Production Process through Supercritical method. The Supercritical Biodiesel Production Process is the third generation technology that does not require any catalyst whatsoever to convert Feedstocks (Oils & Fats) with a wide range of Fatty Acid range between 0 to 100 percent to Methyl Esters and high-quality Glycerin.

All in all, the renewable diesel and traditional biodiesel differ quite a lot; in fact, they are two completely different products. Because renewable diesel is a cleaner, higher quality product that stands cold and storage much better than traditional biodiesel, the benefits that renewable diesel offers to the vehicle, the motorist, and ultimately the climate are the greatest when 100% renewable diesel is used.

Renewable Process Solutions – RPS Official Website

RPS has developed a unique hybrid biodiesel plant that combines traditional biodiesel production technology with a new-generation patented supercritical process. This provides significant benefits in situations where the aim is to deal with reasonably challenging feedstocks with a free fatty acid (FFA) content between 0 and 20 %.
