The Theory of Constraints is a process improvement methodology that emphasizes the importance of identifying the "system constraint" or bottleneck. By leveraging this constraint, organizations can achieve their financial goals while delivering on-time-in-full (OTIF) to customers, avoiding stock-outs in the supply chain, reducing lead time, etc.

## Theory of Constraints - Lean Manufacturing

The Theory of Constraints is an organizational change method that is focussed on profit improvement. The essential concept of TOC is that every organization must have at least one constraint. A constraint is any factor that limits the organization from getting more of whatever it strives for, which is usually profit.

What is the Theory Of Constraints (TOC) by Eliyahu ...

In the early development of the ToC, the Constraint was to be considered a physical thing, like a machine or some capability. This evolved into thinking of the Constraint is a set of rules or policies that govern the utilization of physical resources.
