section on Infra-Red Spectroscopy; The Nuclear Magnetic Resonance discussion and presentation has been re-worked such that the different methods of sample preparation, and instrument operation for continuous-wave and FT-NMR have been made to contrast more sharply. A number of NMR spectra, with suggestions on presentation of the data, and basic interpretation have also been added; and lastly, presentation of a more modern outline of the instrumentation of HPLC includes discussion of automatic injectors.

Written for the laboratory that accompanies the sophomore/junior level courses in Organic Chemistry, Zubrick provides
