the book of the circle reveals the path into the circle of being the path transcends eastern philosophy and western ethics bringing together the whole of human experience the path into the circle is real and open to every living being it is the path of ascent into the circle of being

geometry the line and the circle is an undergraduate text with a strong narrative that is written at the appropriate level of rigor for an upper level survey or axiomatic course in geometry starting with euclid s elements the book connects topics in euclidean and non euclidean geometry in an intentional and meaningful way with historical context the line and the circle are the principal characters driving the narrative in every geometry considered which include spherical hyperbolic and taxicab as well as finite affine and projective geometries these two objects are analyzed and highlighted along the way

the reader contemplates fundamental questions such as what is a straight line what does parallel mean what is distance what is area there is a strong focus on axiomatic structures throughout the text while euclid is a constant inspiration and the elements is repeatedly revisited with substantial coverage of books i ii iii iv and vi non euclidean geometries are introduced very early to give the reader perspective on questions of axiomatics rounding out the thorough coverage of axiomatics are concluding chapters on transformations and constructibility the book is compulsively readable with great attention paid to the historical narrative and hundreds of attractive problems
