angular how to fix property does not exist on type error asked 7 years 11 months ago modified 4 years 7 months ago viewed 300k times

i would like to understand how the built in function property works what confuses me is that property can also be used as a decorator but it only takes arguments when used as a built in function

in my situation i had my property auto initialize a command in a viewmodel for a view i changed the property to use expression bodied initializer and the command canexecute stopped working here s

descriptors like property need to be in the type s dictionary to work their magic so those in a class definition primarily affect the behaviour of instances of the class with minimal effect on the behaviour

jun 30 2011 the property in meta tags allows you to specify values to property fields which come from a property library the property library rdfa format is specified in the head tag

oct 18 2023 1 use the license property on the excelpackage class if you are a noncommercial organization excelpackage license setnoncommercialorganization my noncommercial

16 how to add property to a python class dynamically say you have an object that you want to add a property to typically i want to use properties when i need to begin managing access to an attribute

mar 12 2014 the property attribute comes from rdfa rdfa 1 1 extends html5 so that it s valid to use meta and link elements in the body as long as they contain a property attribute you can use

mar 23 2009 a note to everyone use the memberexpression approach listed here only to get the name of the member not to get the actual memberinfo itself because the memberinfo returned is

2 in str s answer value undefined will be returned instead of the set default value if the property is

undefined this sometimes can cause bugs the following will make sure the defaultval will always
